Mohamed Shez

Applications, data tools, and the systems behind them.

SUMMARY

Full-stack software engineer with 13 years of experience building and maintaining web applications. My toolkit spans frontend interfaces, Java and Python services, data tools, and cloud delivery. I care about usable interfaces, maintainable code, testing, and ownership beyond the first release.

PROFESSIONAL EXPERIENCE

PRIVATE BY DESIGN

Detailed employment history is intentionally kept out of this public CV. Recruiters and companies are welcome to get in touch for a tailored overview of relevant roles, responsibilities, and experience.

AVAILABLE
ON REQUEST

SELECTED WORK

KASH.lv	Latvian marketplace with production and development storefronts and dedicated administration back offices. Source remains private.
OSINT & WorldviewOS	Public map-based applications exploring open-source intelligence and globe-based data overlays. Source and attribution are available from my portfolio.
shez.app	Personal Next.js portfolio with a daily public GitHub feed, accessible project directory, and tested releases on Vercel.
Todo & data tools	React and Next.js task applications with browser storage, alongside Python experiments and data-comparison tools available on GitHub.

HOW I WORK

Build with intent Turn unclear problems into practical, usable applications.	Own the details Connect interface, backend, data, delivery, and maintenance.
Keep learning Explore new tools while keeping solutions understandable and durable.	Share selectively Publish useful technical work while protecting private context.
