EXPERIENCE

PROFESSIONAL EXPERIENCE

Detailed employment history is intentionally kept private in this public CV. Recruiters and companies are welcome to get in touch via email or LinkedIn for a tailored overview of relevant work experience.

SELECTED PROJECTS

KASH.lv

Latvian marketplace with production and development storefronts and dedicated administration back offices. Source remains private.

OSINT & WorldviewOS

Public map-based applications exploring open-source intelligence and globe-based data overlays. Source and attribution are available from my portfolio.

shez.app

Personal Next.js portfolio with a daily public GitHub feed, accessible project directory, and tested releases on Vercel.

Todo & data tools

React and Next.js task applications with browser storage, alongside Python experiments and data-comparison tools available on GitHub.

PUBLIC PROFILE

My public portfolio focuses on the engineering work I choose to share: practical applications, data tools, technical skills, education, and selected personal projects. Please reach out for further information about my professional background.

SUMMARY

Full-stack software engineer with 13 years' experience building and maintaining scalable web applications using TypeScript, JavaScript, React, Next.js, Tailwind CSS, and Java Spring Boot. Detail-oriented, collaborative, and analytical across design, implementation, testing, and deployment of high-quality software.
